Work Experience

Software Engineer II, *Dick's Sporting Goods* 10/2024 – Present
Pittsburgh/Hybrid

Working on the product details page UI team in e-commerce. Consistently delivering feature development, core web vitals (CWV) improvements, and stability on a business critical application in the purchase funnel. This includes leading the building and launching of warranties, a net new source of revenue on the site. Additionally led the implementation of new loyalty features, and most recently, the addition of a core flow on the page; the buy now experience. Between team responsibilities, led the technical side for the successful launch of an internal mentorship matching platform creating over 100 mentorship relationships in the company.

Software Engineer I, *Dick's Sporting Goods* 06/2023 – 10/2024
Pittsburgh/Hybrid

Completed Tech Development Program specializing in three areas.
Cart & Checkout UI, E-commerce: Enhanced address validation (AVS), and payment script resiliency stabilizing the end of the end of the purchase journey on the website.
Reverse Logistics: Upgraded claims processing application core flows, worked to integrate with mobile hardware, and improved and extended backend services.
Store Browse & Select: Led PLP refresh, developed app resiliency features, implemented pricing on a customer facing product, and decommissioned legacy app.

Software Engineering Intern, *Dick's Sporting Goods* 05/2022 – 06/2023
Pittsburgh/In-Person

Partnered with a fellow intern to contribute to a point of sale system rollout. Built new application features, a tool that accelerated migration, and a configuration platform

IT Internship, *American Handiwork Inc* 06/2020 – 08/2020
Remote

- Assessed company website hosted in AWS to enhance and extend existing code base leveraging Amazon AWS and WordPress, established a cost-effective client portal solution, and led defect triage and resolution through collaboration with team
