Work Experience

Software Engineer II, Dick's Sporting Goods Working on the product details page UI team in E-commerce. Delivering feature development, performance improvements, and stability on a business critical application in the purchase funnel — including building and launching warranties and loyalty features, and driving Angular best practices migrations. Also technically led the successful launch of an internal mentorship matching platform	10/2024 – Present Pittsburgh/Hybrid
Software Engineer I, Dick's Sporting Goods - Completed Tech Development Program specializing in three areas: - Cart & Checkout UI, E-commerce (5 months): Enhanced address validation, improved payment reliability, and boosted site stability. - Reverse Logistics (5 months): Upgraded claims processing app core flows, integrated mobile hardware, and strengthened backend services. - Store Browse & Select (5 months): Led PLP refresh, developed app resiliency features, implemented multi-store pricing, and decommissioned legacy app. - Contributed significantly to creating an internal mentorship matching platform.	06/2023 – 10/2024 Pittsburgh/Hybrid
Software Engineering Intern, Dick's Sporting Goods Partnered with a fellow intern to contribute to a point of sale system rollout. Built new application features, a tool that accelerated migration, and a configuration platform	05/2022 – 06/2023 Pittsburgh/In-Person
IT Internship, American Handiwork Inc - Assessed company website hosted in AWS to enhance and extend existing code base leveraging Amazon AWS and WordPress - Efficiently configured software to establish remote workstations for employees - Established a cost-effective client portal solution and seamlessly integrated it into the company website - Led defect triage and resolution through collaboration with team	06/2020 – 08/2020 Remote

Education
